# Pedagogy of Biological Science

**M.D.U.**

**B.Ed.**

**Payal Bhola Jain**

# CONTENTS

## UNIT-I

### 1. Nature, History, Scope and Interdisciplinary Linkage of Biological Sciences ..... 3

1. Describe the nature and history of Biological Science..... 3
2. Describe the scope and interdisciplinary linkage of Biological sciences..... 7
3. Discuss aims and objectives of Biological Science education at the secondary level.

*Or*

Explain the general aims of teaching Biological Sciences. Also justify the inclusion of this subject in secondary school curriculum..... 11

4. Bring out the difference between the terms and objectives. Explain the general aims of science at school level.

*Or*

What are the general aims of teaching Biological sciences in our schools? Also differentiate between the terms aims and objectives?

*Or*

Explain in detail the general aims and objectives of teaching Biological-science. .... 12

5. What do you mean by the term specification of the objectives? Provide a scheme of specification for the objectives of teaching Biological Sciences at the school stage.

*Or*

What is the relationship of instructional objectives with General Aims and Objectives of Teaching Life Sciences?

*Or*

State the different general objectives of teaching Biological Sciences at the school stage..... 14

6. Describe the facts and principles of Biology and its applications consistent with the stages of cognitive development.

*Or*

**2. Pedagogical Analysis ..... 67**

1. Describe the meaning, importance and steps of Pedagogical analysis.

*Or*

What do you mean by pedagogical analysis of a content material in the subject Biological Science? Explain by laying emphasis on the need of such analysis.

*Or*

Explain the concept and procedure of Pedagogical analysis of a unit in detail by quoting examples.

*Or*

Explain clearly what do you mean by the term pedagogy or science of teaching? ..... 67

2. Discuss the role played by pedagogy in a teacher's teaching.

*Or*

Discuss the concept of pedagogical analysis of a unit. How pedagogical analysis of a unit can be useful to a science teacher?

*Or*

Discuss the concept of pedagogical analysis of unit. How pedagogical analysis of a unit can be useful to a teacher? Discuss the procedure of pedagogical analysis. .... 69

3. What is Photosynthesis? What actually goes inside the process of photosynthesis? Explain in detail.... 72

4. Perform pedagogical analysis of subject content on photosynthesis for class X. .... 73

5. Discuss in brief the role of various organs of our digestive system in digesting the foods and liquids. 75

6. Discuss in brief our respiratory system for carrying out the process of respiration. .... 76

7. Develop a content-cum-pedagogical analysis note on Digestive System. .... 78

8. What is a food chain? Explain its meaning and concept through proper illustrations and examples. .... 81

9. What do you mean by pedagogical analysis? Carry out pedagogical analysis of a topic on Food Chain for Class X. .... 82

Or  
What do you understand by pedagogical analysis of the content? Give a brief account of the activities and experiments for both class students on the following major concepts. .... 82

10. What is Ecological Balance? ..... 86

11. How is the Ecological Balance maintained or disturbed? ..... 86

12. Develop a content-cum-pedagogical analysis note on Ecological balance..... 89

13. What is the meaning of heredity and environment? Discuss in detail.

Or  
"Development is the matter of both heredity and environment." Explain this statement and illustrate the relative importance of heredity and environment in growth and development

Or  
Discuss the importance of heredity and environment in the development of personality.

Or  
Heredity and environment are complementary to each other. Justify..... 92

Short-Answer Type Questions ..... 101

### UNIT-III

3. Development of Instructional Material..... 109

1. Under what major section has the content been divided in life sciences books for schools, prepared by NCERT (India)?..... 109

2. Comment upon Unit Planning..... 111

Or  
What is unit planning? Discuss how can it be properly carried out in the subject life sciences.

Or  
Discuss with an example the procedure of unit planning in the subject life sciences..... 111

3. What is lesson planning? How will you proceed to plan lesson for teaching life sciences? Answer in the light of the famous Herbertian steps for the lesson planning?

Or

What is lesson planning? How can this task be carried out by a teacher of life sciences?..... 117

4. What is meant by the term teaching aids? What types of different teaching aids may be used in teaching of life sciences? Discuss the preparation of any type of teaching aid used by you in your training programme.

*Or*

Discuss the importance of using teaching aids in teaching life sciences. .... 128

5. What are graphic aids? Discuss the preparation of charts, pictures and diagrams in the teaching of life sciences..... 132
6. Discuss the preparation of different types of models through a variety of materials like clay, plaster of paris, cardboard, thermocole, paper-machie etc. for the teaching of life sciences..... 134
7. Give a detailed account of the preparation of aquarium for teaching Life Science concepts at the secondary level.

*Or*

Describe the development of an aquarium.

*Or*

Explain how an aquarium is devised.

*Or*

Justify the need of developing aquarium, vivarium and terrarium in the school campus for the teaching of life sciences.

*Or*

How will you establish a good aquarium, vivarium and terrarium for your school science museum? Discuss the educational advantages drawn through them..... 136

8. Describe the development of demonstration experiments.

*Or*

Explain how a demonstration experiment is organised.

*Or*

How would you as a teacher of life sciences proceed for the development of demonstration experiments for the teaching of your subject? Discuss in detail.

*Or*

Justify the need of performing demonstration experiments in the subject life sciences by the teacher in the classroom..... 139

9. Describe the development of self-instructional material. (Linear programming)

*Or*

Describe in brief the various phases of developing programmed instructional material in the teaching of life sciences.

*Or*

Discuss in detail the various activities undertaken by a programmer while preparing his programme for the instructional material related to the teaching of life sciences.

*Or*

Discuss the procedure of writing a programme or preparing an instructional material through linear programming in life sciences. .... 142

10. What is linear programming? Throw light on its characteristics.

*Or*

What is linear programming? Why is it termed as linear or extrinsic? Discuss its procedure.

*Or*

Explain linear programming in detail..... 145

11. What do you mean by Programmed Learning? Explain it.

*Or*

Write an essay on Programmed Learning in Indian Context.

*Or*

Explain with examples the Principles of Programmed Learning.

*Or*

What are the Principles of Programmed Learning? Explain with examples the different styles of programming.

*Or*

Write a short note on Principles of Programmed Learning.

*Or*

What is Programmed Learning? What are the Principles underlying Programmed Learning? Discuss..... 148

12. What are the different styles of Programming? Explain.

*Or*

What do you mean by Programmed Learning? Explain the chief characteristics of Linear Programming.

*Or*

Explain programmed learning. Illustrate with example "Branching" as one of the styles of programming.

*Or*

Explain different characteristics of a linear programming. Discuss its advantages and limitations..... 150

13. What is the difference between programmed instruction and traditional teaching methods? Write in detail various steps for preparing a programme. What are its advantages and limitations of programmed learning?

Or

Write a short note on Branching System of Programming.

Or

What do you mean by Programmed Learning? Explain at length the process of preparation of programmed learning material.

Or

How will you prepare programmed learning material? Discuss in detail.

Or

Describe in brief the steps involved in the development of programmed instruction. .... 154

14. Explain problem solving method of teaching in life science at school level. Discuss its merits and demerits.

Or

Discuss problem solving method in the light of Indian conditions for secondary level classes.

Or

Explain problem solving method of teaching life science with the help of an example.

Or

What are the steps in problem solving method? Discuss them by using an example. .... 160

15. What do you mean by Investigatory approach? Describe the merits and demerits of Investigatory approach. .... 164

16. What is Collaborative Learning? Discuss the basic assumptions and features of collaborative learning.

Or

What is collaborative learning? Discuss the merits and advantages of collaborative learning.

Or

Write a note on collaborative learning. .... 166

17. What do you know about experimental learning. Describe the merits and demerits of experimental learning. .... 169

18. "Micro-Teaching is the real teaching". In the light of this statement discuss the importance and advantages of Micro-Teaching.

Or

What is Micro-Teaching? Write in detail Indian Model of Micro-Teaching.

Or

What is Micro-Teaching? Discuss its merits and limitations for teachers' training programme.

Or

Write short note on Micro-Teaching concept and its significance..... 173

19. Discuss the general process involved in micro-teaching by mentioning different steps and activities.

Or

What is micro-teaching cycle and what are the differences between micro-teaching and traditional teaching? ..... 178

20. What is the importance of Micro-Teaching? Prepare an Indian Model of Micro-Teaching..... 181

21. What do you mean by Skill of Introducing the Lesson? Describe the component behaviours and observation schedule of this skill. .... 183

22. What do you mean by skill of questioning? Describe the component behaviours and observation schedule of this skill. .... 185

23. What do you mean by Skill of illustration? Describe the component behaviours and observation schedule of this skill. .... 187

24. What do you understand by skill of explaining? Illustrate the process of developing various components of the skill through a micro-lesson. .... 191

25. What do you understand by the Skill of Stimulus Variation? Illustrate the process of developing various components of this skill through a micro lesson.

Or

What do you mean by Skill of Stimulus Variation? Describe the component behaviours and observation schedule of this skill. .... 194

26. Discuss the different components of the following teaching skills :

(a) Questioning  
(c) Introduction

(b) Explaining  
(d) Stimulus Variation

Or

Discuss micro-teaching skills of questioning explanation and introduction with examples. .... 197

Short-Answer Type Questions ..... 205

**UNIT-IV**

**4. Concept of Measurement and Evaluation ..... 223**

1. Explain the concept of Measurement. How is it different from Evaluation? Explain it with examples.

*Or*

What do you mean by measurement and evaluation?

*Or*

Define and discuss the terms measurement and evaluation by clearly distinguishing them from each other.

*Or*

Discuss in detail the concepts of test, measurement and evaluation.

*Or*

What is evaluation ? How does it differ from measurement? Discuss..... 223

2. Give an account of Formative Evaluation.

*Or*

Explain the Formative Evaluation in detail.

*Or*

Discuss in brief Formative Evaluation.

*Or*

What is Formative Evaluation ? State the characteristics, principles and uses of Formative Evaluation.

*Or*

Write a note on Formative Evaluation..... 226

3. Give an account of Summative Evaluation.

*Or*

Discuss in brief Summative Evaluation.

*Or*

What is Summative Evaluation ? State the characteristics. Mention the steps for test construction in Summative Evaluation. What are the uses of Summative Evaluation?

*Or*

Write a note on Summative Evaluation..... 228

4. Differentiate between Formative and Summative evaluation. Is there need to study such type of content to students in Physical Sciences..... 230

Or

Differentiate between 'Formative' and 'Summative' Evaluation. .... 230

5. Discuss in brief Diagnostic Evaluation.

Or

Write a note on Diagnostic Evaluation.

Or

What is diagnostic test? How diagnostic evaluation can be done? Explain..... 231

6. Discuss the concept of diagnostic testing and remedial instruction. Describe the steps of preparing a diagnostic test. .... 234

7. How diagnostic test is different from achievement test? What remedial teaching you will suggest for students who is efficient in Biological Science? .... 236

8. What are achievement tests? What steps are to be followed for the construction of a teacher made achievement test in life sciences? Discuss.

Or

Explain the procedure of construction of an objective type achievement test. .... 238

9. How will you prepare an achievement test in life sciences comprising objective type items. Illustrate with an example. .... 240

10. Explain the attributes of a good test.

Or

Describe the attributes of a good achievement test.

Or

Discuss the attributes of a good or an ideal achievement test in life sciences.

Or

What are achievement tests? Name and outline their different types..... 242

11. Grading is important part to assess the personality of children. How is it needful in different ways? Explain the nature and scope.

Or

✓ Explain how grading is done in educational evaluation.

Or

Explain the different types of grading. .... 244

12. Differentiate between evaluation, comprehensive and continuous evaluation. Which is the best?

*Or*

"Evaluation is comprehensive and continuous". Discuss the statement in view of the inter-relationship between objective, learning experience and evaluation..... 247

13. What is the need and importance of comprehensive and continuous evaluation? Name various objective type tests by giving one example of each.

*Or*

Discuss in detail evaluation as a continuous and comprehensive process.

*Or*

Write the merits and demerits of comprehensive and continuous evaluation. .... 248

☛ **Short-Answer Type Questions ..... 253**
